Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 13-18, drawn to a cleaning system.

Group II, claim(s) 19-23, drawn to a method of cleaning.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the apparatus claims lack any means to determine that the system needs to be cleaned, a recitation that the method claims explicitly call for, a special technical feature found in claim 19 that does not exist in claim 13 (see page 9, lines 3-6 of the specification).

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

First species of Figures 2a,

Second species of Figure 2b

Third species of Figure 2c,

Fourth species of Figure 3, as shown (engine heats cleaning fluid),

Fifth species of Figure 3 with the engine heat exchanger 325 omitted (as described on page 8, lines 25-29 (but not separately illustrated),

Sixth species of Figure 4 (steam cleaning using an external supply of heated fluid for cleaning),

Seventh species of Figure 5,

Eighth species, not illustrated, as disclosed on page 12, lines 13-27 of the specification,

Ninth species of Figure 6,

Tenth species of Figure 7 and

Eleventh species of Figure 8.

In the event that applicant elects and one of the non-illustrated species above, a drawing correction of that species, without introducing any new matter, is required in response to this office action.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims

are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The following claim(s) are generic: none.

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: the only special technical features common to all of these species is a distribution tube having a nozzle which according to the European search report is shown in EP 1095805A1.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
